

PRIYANSH KUMAR ROY

AI Automation Engineer

AI Workflow Automation | Business Process Automation | AI Systems Design

India | +91 9958061787 | priyanshroy300@gmail.com

LinkedIn: [priyansh kumar roy](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI Automation Engineer with hands-on experience designing reusable AI systems that streamline lead management, customer engagement, content operations, and internal business workflows. Skilled in translating business problems into practical automation solutions using n8n, AI models, REST APIs, webhooks, and low-code technologies. Built and validated real-world automation systems through internship projects and client pilots, with a strong focus on modular architecture, workflow documentation, and scalable system design.

TECHNICAL EXPERTISE

AI & LLMs: OpenAI API, Google Gemini, Ollama, Llama, Prompt Engineering

Automation: n8n, Make, Zapier

Integration: REST APIs, Webhooks, JSON, API Integrations

Platforms: Google Sheets, Firebase, Notion, WhatsApp Cloud API, Twilio

Programming: Python

PROFESSIONAL EXPERIENCE

AI Automation Engineer |

January 2025 – Present

Design AI-powered business systems for coaching institutes and service-based businesses, focusing on lead management, customer engagement, workflow automation, and operational efficiency.

- Designed and built 30+ reusable AI workflow architectures across lead management, CRM automation, reporting, onboarding, customer support, and business operations.
- Designed modular AI systems that solve recurring business problems through reusable workflow architectures instead of one-off automations.
- Built workflow solutions using n8n, OpenAI, Google Gemini, REST APIs, Webhooks, Google Sheets, Notion, Twilio, and WhatsApp Cloud API.
- Created structured implementation guides and workflow documentation to simplify deployment, maintenance, and scalability.

- Designed automation systems across education, healthcare, and service-based business workflows.

Featured Client Implementation — The Original Tutors

- Designed an AI-powered Lead Conversion & Enrollment System covering enquiry handling, FAQ automation, lead qualification, demo scheduling, follow-up automation, enrollment, and payment reminders.
- Designed, built, tested, and validated a 3-day pilot implementation demonstrating AI-assisted enquiry handling and structured lead management.
- Architected a reusable enrollment workflow adaptable across coaching institutes with minimal customization.

AI Automation Intern | Caremeez

October 2024 – December 2024

Built AI-powered content operations and publishing workflows for healthcare marketing automation.

- Designed and deployed an AI-powered workflow that automatically generated content and published text posts across Facebook and LinkedIn.
- Built an intelligent content operations system to classify doctor-generated content, generate/refine captions using AI, and route content for publishing.
- Automated content processing using Firebase, Google Sheets, AI models, REST APIs, and n8n.
- Collaborated with stakeholders to translate operational requirements into automation solutions.
- Created modular workflow architectures and implementation documentation.

FEATURED AI SYSTEMS

AI Lead Conversion & Enrollment System

- Automated the complete student journey from enquiry to enrollment using AI-assisted conversations, follow-ups, and payment reminders.

AI Content Operations Engine

- Automated healthcare content generation, classification, caption optimization, and multi-platform publishing.

AI Marketing Outreach & WhatsApp SDR Engine

- Built AI-assisted outreach, follow-up, CRM synchronization, and conversation routing workflows.

AI Client Onboarding System

- Automated onboarding from form submission to documents, email communication, task creation, and CRM updates.

AI Performance Analytics & Reporting System

- Built automated reporting workflows for dashboards, summaries, and operational insights.

EDUCATION

Bachelor of Science (PCM)

IIMT University

Expected Graduation: 2027

CERTIFICATIONS

- NPTEL – The Joy of Computing Using Python | Elite + Silver | Score: 85%

ACHIEVEMENTS

- Selected among the Top 50 teams across India for the IIP Hackathon and presented an innovation prototype at the national summit.
- Successfully executed a real-world AI automation pilot for a coaching institute.
- Designed and documented 30+ reusable AI workflow architectures.
